JABIR MAHMUD

Full-Stack Software Engineer

jabir.pro.bd
github.com/Jabirmahmud0
linkedin.com/in/jabirmahmud0

SUMMARY

Full-stack engineer building AI-powered web products end to end, from RAG pipelines and real-time systems to multi-tenant SaaS and payments. Shipped a voice assistant for Domino's store staff at Ainomiq, three live client sites, and two SaaS platforms: LeadLens, an AI prospect intelligence tool, and NexDokandar, a POS and inventory system. Core stack is TypeScript, React, Next.js, Node.js, and PostgreSQL.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, SQL
Frontend	React, Next.js, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS, Framer Motion
Backend	Node.js, Express, FastAPI, Socket.IO, Stripe, REST APIs, Background Workers
Databases	PostgreSQL, pgvector, Drizzle ORM, Redis, MongoDB, Supabase
AI and Tooling	RAG, Gemini, OpenAI API, Claude, Groq, Deepgram, Claude Code, Codex, Antigravity
DevOps and Testing	Docker, GitHub Actions, Vercel, Render, Vitest, Playwright, Sentry

EXPERIENCE

Junior Developer (Full-Time) | Ainomiq, Netherlands (Remote)

Mar 2026 – Sep 2026

- Developed and enhanced web application features using Next.js, React, TypeScript, and modern backend technologies.
- Delivered Contributed to AI-powered application functionality, including LLM integrations, retrieval-based workflows, and API-driven features.
- Built and improved interactive interfaces, data-driven dashboards, and application workflows.
- Collaborated remotely with an international development team on feature implementation, testing, and product improvements.

Freelance Web Developer

Jun 2024 – Present

- Built and launched three client sites end to end: **CivilPoint** (stationery e-commerce), **Deenipartner** (matrimony platform with search and filtering), and **AlJaami** (sportswear e-commerce).

PROJECTS

NexDokandar – Enterprise SaaS Admin & POS Platform

Feb 2026 – May 2026

Technologies: React 18, Node.js, Express v5, TypeScript, PostgreSQL, Socket.IO, JWT, Stripe, Cloudinary, Gemini API, Tailwind CSS, Redux Toolkit

https://nexdokandar.vercel.app

- Co-architected a scalable multi-tenant POS and inventory platform on Express v5 and PostgreSQL.
- Engineered real-time order updates via Socket.IO, improving operational efficiency by 30%.
- Designed JWT-based RBAC with dynamic route protection across 30+ modular UI views.
- Built state-machine-driven APIs for partial refunds, due calculations, and serialized product tracking.
- Built an AI-powered bundle recommendation engine (Gemini 2.5 Flash) with inventory liquidation strategy and duplicate prevention via PostgreSQL cross-referencing.
- Built API key and webhook token systems for secure courier integrations.
- Implemented prompt-to-product generation that auto-generates title, SKU, pricing, and description through LLM inference.

LeadLens – AI-Powered Prospect Intelligence SaaS

Technologies: Next.js 16, React 19, TypeScript, Neon PostgreSQL, Drizzle ORM, Express, Gemini, Groq, Stripe

https://leadlens.saevix.dev | https://github.com/Jabirmahmud0/LeadLens

- Built a multi-tenant SaaS turning prospect websites into evidence-backed sales briefs, fit scores, and outreach direction based on each agency's ICP, services, and pricing.
- Architected a 14-stage asynchronous pipeline with transactional job claiming, retries, stale-job recovery, Gemini key/model rotation, and Groq failover.
- Implemented Argon2id authentication, organization-level authorization, Stripe billing, and SSRF-safe crawling; the app scores 100 Lighthouse performance on desktop.

EDUCATION

B.Sc. in Computer Science and Engineering

2022 – Dec 2025

Daffodil International University, Dhaka, Bangladesh
